ALUTEC Launches New Alloy Wheel SOLAR Especially for Electric Cars

Bad Dürkheim, September 6, 2021

ALUTEC, a brand of Superior Industries, is starting the fall season by launching the new SOLAR alloy wheel. Styled for the use on electric vehicles, the wheel is now available in two different color versions as a 19-inch variant with several five-hole connections.

ALUTEC is celebrating its 25th anniversary in 2021. To mark the occasion, the brand is heralding a new era with SOLAR, the first alloy wheel from ALUTEC to be designed especially for electric cars. With its distinctive character, SOLAR brings an unmistakable style to the road.

Distinctive details set the wheel apart

Graphic details on the spokes give the wheel a sporty look. This fits in perfectly with the sustainable vehicles and gives them a unique recognition value. To begin the new season, SOLAR is available in the colors metal-grey and diamond-black. The 8.0 x 19-inch version comes with various five-hole connections, meaning that it fits many common electric car models.

Get in and take off: ECE certified

In addition to its appearance, SOLAR is also set apart by how easy it is to purchase – almost all versions are ECE certified and can be operated without further tests or inspections. That means you can simply mount the wheels on the approved tires and set off straight away. What's more, ALUTEC grants the popular five-year warranty for SOLAR. The wheels are therefore protected, allowing you to relax and enjoy the ride.
